- Delivers clearer calls and more stable 4G, 5G mobile data indoors

INSTANT SIGNAL BOOST

UP TO +80db GAIN

SUPPORTS UP TO 30 USERS CONNECTIONS

FAST NETWORK & DATA SPEED

ABOUT

Reliable signal starts at the source, and Signal Hero Max 1500 Pro is the ultimate professional-grade system for stable mobile connectivity across properties of up to 1,500 sqm. Missed calls, dropped connections, and slow data no longer need to disrupt operations in offices, very large homes, hotels, warehouses, or low-coverage locations across the UK.

Designed as a universal professional solution, Signal Hero Max 1500 Pro supports all major UK mobile networks, providing reliable 4G voice and data alongside strong 5G connectivity where available. Its advanced architecture, powerful amplification, and intelligent signal management efficiently handle supported 4G and 5G frequencies.

A professional-grade external antenna captures the available outdoor signal and transmits it through high-performance cabling to the booster unit. The amplified signal is then distributed through multiple indoor antennas, delivering clearer calls, stronger signal bars, and more stable mobile data across large and multi-room buildings.

With coverage of up to 1,500 sqm and the ability to work with multiple nearby cell masts, it is ideal for offices, very large houses, hotels, warehouses, and commercial properties where multiple networks and many users require dependable service. Installation follows a professional UK-standard layout, with no subscriptions or ongoing fees. **A 60-day money-back guarantee and 3-year warranty provide additional confidence.**

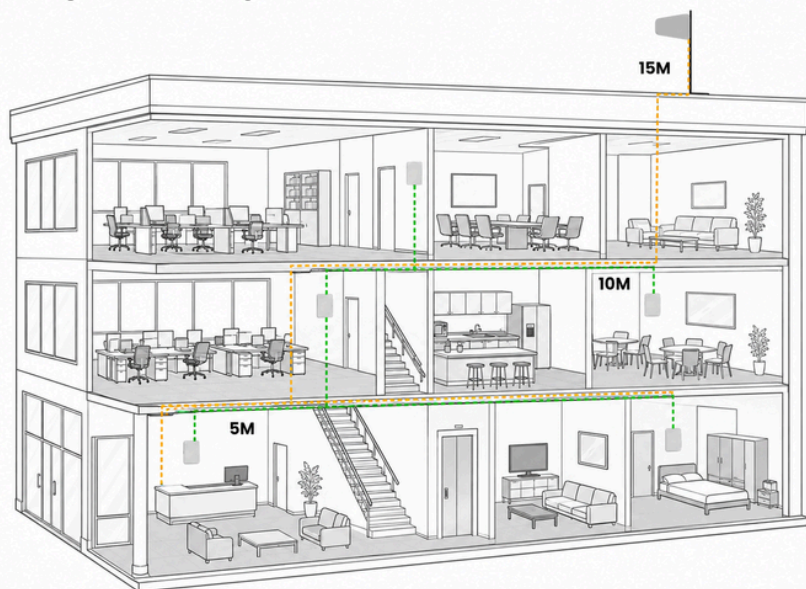

KIT INCLUDES

SPECIFICATIONS

MODEL NUMBER	SH208317-1500-Pro
FREQUENCIES	BAND 20, 8, 3, 1 and 7 800MHz / 900MHz / 1800MHz / 2100MHz / 2600MHz
MAX GAIN	80 dB ±2
IMPEDANCE	50 Ohm
POWER SUPPLY	AC 100-240V
CONNECTORS	N-FEMALE
BOOSTER DIMENSIONS	49 x 20 x 5.5 cm
BOOSTER WEIGHT	<5kg

INSTALLATION

1

The signal is received from the outdoor cell towers and transmitted through the cable to the booster box.

2

The booster box receives the signal from the outdoor aerial and retransmits it to the indoor antenna via a cable.

3

The panel antenna mounted on the wall receives the signal and retransmits a clean, high-quality phone signal throughout the property.
