

# Hero Max 600

SKU SH208317-600

PRICE £795

## FEATURES

- Improves 4G, 5G signal and voice calls, SMS on EE, O2, Vodafone, Three, and other UK networks, with full 5G coverage support
- Universal solution for both rural and urban areas, including semi-rural and low-coverage locations
- Delivers clearer calls and more stable 4G, 5G mobile data indoors

## ABOUT

Reliable signal starts at the source, and Signal Hero Max 600 is built to deliver stable mobile connectivity across homes and workplaces of up to 600 sqm. Missed calls, dropped connections, and slow data no longer need to be part of daily life in rural, semi-urban, urban, or low-coverage areas across the UK.

Designed as a universal solution, Signal Hero Max 600 supports all major UK mobile networks, providing reliable 4G voice and data alongside strong 5G connectivity where available. Its advanced architecture efficiently handles modern 4G and supported 5G frequencies.

An external antenna captures the available outdoor mobile signal and transmits it through professional-grade cabling to the booster unit. The signal is then amplified and redistributed throughout the property via indoor panel antennas, resulting in clearer calls, stronger signal bars, and more stable 4G and 5G mobile data.

With coverage of up to 600 sqm and the ability to work with multiple nearby cell masts, it is ideal for large homes, offices, hotels, multi-room properties, locations using several mobile providers, and buildings where multiple users require dependable service simultaneously. Installation follows a proven UK-standard layout, with no subscriptions or ongoing fees. **A 60-day money-back guarantee and 3-year warranty provide additional confidence.**

INSTANT SIGNAL BOOST

UP TO +70db GAIN

SUPPORTS UP TO 25 USERS CONNECTIONS

FAST NETWORK & DATA SPEED

## INSTALLATION

1

The signal is received from the outdoor cell towers and transmitted through the cable to the booster box.

2

The booster box receives the signal from the outdoor aerial and retransmits it to the indoor antenna via a cable.

3

The panel antenna mounted on the wall receives the signal and retransmits a clean, high-quality phone signal throughout the property.
