- Delivers clearer calls and more stable 4G, 5G mobile data indoors

INSTANT SIGNAL BOOST

UP TO +70db GAIN

SUPPORTS UP TO 25 USERS CONNECTIONS

FAST NETWORK & DATA SPEED

ABOUT

Reliable signal starts at the source, and Signal Hero Max 300 is built to deliver stable mobile connectivity throughout your home or workplace. Missed calls, dropped connections, and slow data no longer need to be part of daily life in rural, semi-urban, urban, or low-coverage areas across the UK. Designed as a universal solution, Signal Hero Max 300 supports all major UK mobile networks, providing reliable 4G voice and data alongside strong 5G connectivity where available. Its advanced architecture efficiently handles modern 4G and supported 5G frequencies.

An external antenna captures the available outdoor mobile signal and transmits it through professional-grade cabling to the booster unit. The signal is then amplified and redistributed throughout the property via an indoor panel antenna, resulting in clearer calls, stronger signal bars, and more stable 4G and 5G mobile data.

With its extensive connection range and ability to work with multiple nearby cell masts, it is ideal for offices, medium-sized homes, properties using several mobile providers, and locations where multiple users require dependable service simultaneously. Installation follows a proven UK-standard layout, with no subscriptions or ongoing fees. A 60-day money-back guarantee and 3-year warranty provide additional confidence.

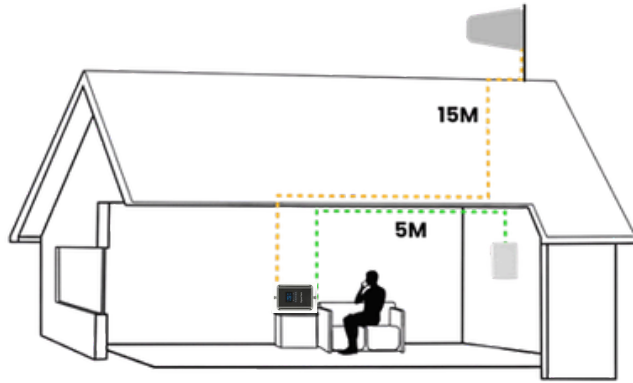

KIT INCLUDES

SPECIFICATIONS

MODEL NUMBER	SH2820831-300
FREQUENCIES	BAND 28 20, 8, 3 and 1 700MHz / 800MHz / 900MHz / 1800MHz / 2100MHz
MAX GAIN	70 dB ±2
IMPEDANCE	50 Ohm
POWER SUPPLY	AC 100-240V
CONNECTORS	N-FEMALE
BOOSTER DIMENSIONS	22 x 14.5 x 5.5 cm
BOOSTER WEIGHT	<2Kkg

INSTALLATION

1

The signal is received from the outdoor cell towers and transmitted through the cable to the booster box.

2

The booster box receives the signal from the outdoor aerial and retransmits it to the indoor antenna via a cable.

3

The panel antenna mounted on the wall receives the signal and retransmits a clean, high-quality phone signal throughout the property.
